

Education

Vellore Institute of Technology

B.Tech - Computer Science (Blockchain Technology)

September 2022 – Present

Vellore, Tamil Nadu, India

CGPA: 9.06/10

Work Experience

SDE Intern

Quick IsCool

May 2024 - July 2024

Remote

- Spearheaded the development of an innovative AI-powered tool, significantly enhancing the user's data visualization capabilities by generating dashboard from user data
- Conducted research on various LLMs and engineered prompts to optimize AI performance for diverse user needs

Web Development Intern

Xlancr Infotech

January 2024 - April 2024

Vellore, Tamil Nadu, India

- Engineered responsive project management dashboard (Next.js, TypeScript, Tailwind) - improved functionality and UX.
- Quickly learned and applied new technologies (Typescript, Zustand).

Projects

Driver Manager

github.com/arduR-O/motorq

- Built a full stack web app to add and manage drivers using Next.js, Tailwind CSS, Prisma and PostgreSQL
- Used React Leaflet to integrate location based features
- Used transactions to avoid race conditions

Dashboard Genie

dashboard-genie-nfoz.vercel.app

- Crafted a user-centric web application using Next.js and TypeScript, enhancing overall user experience and interaction
- Integrated Groq API to seamlessly retrieve and display dashboards from various Large Language Models (LLMs)
- Optimized data visualization performance by implementing react-virtualizer for efficient rendering of large datasets
- Developed a customizable dashboard export feature, allowing users to tailor output according to their specific needs

Cook-Off 8.0 Landing Page

cookoff23.codechefvit.com

- Developed a responsive website using Next.js, Tailwind CSS, and Framer Motion libraries in collaboration with two team members.
- Incorporated interactive elements and hidden easter eggs to enhance user engagement.

Property Price Analysis

github.com/arduR-O/cerina_assignment

- Executed end-to-end machine learning project involving data cleaning, exploratory analysis, geospatial analysis, sentiment analysis using RoBERTa, hyperparameter tuning, and model evaluation.
- Achieved impressive results with a decision tree model boasting a mean squared error of 0.14.

Skills

HTML/CSS

JavaScript

TypeScript

Python

C++

PostgreSQL

React.js

Next.js

Tailwind

Prisma

Machine Learning

PyTorch

Pandas

Numpy

Seaborn

Problem Solving

Achievements

- 3 star coder on CodeChef

codechef.com/users/ardur
- 131 problems solved on CodeForces

codeforces.com/profile/arduR

Certifications

- Meta Front-End Developer Specialization
